

# Full Arch Edentulous Implant Treatment:

**Patient Selection, Case Acceptance, Treatment and On-Going Care and Maintenance**

**PRESENTED BY DR. SAM EL-EBRASHI, BDS, MS, FACP**

The treatment of complete and single arch edentulism is a significant priority for dental clinicians and patients in need.

Many edentulous patients desire a fixed treatment option and have had poor experiences with traditional removable treatment options. The concept of immediate implant placement and temporization is attractive to patients, due to shorter treatment times, and a more predictable outcome. Additionally, there are many patients with a failing or "terminal" dentition who are aware of the 'All on Four' Procedure, and are actively pursuing this treatment.

Participants will learn who to treat, how to explain the treatment and associated fees, and how to promote the 'All on Four' approach in clinical practice. Participants will learn how to identify and evaluate appropriate candidates for such treatment, and discuss immediate placement and loading of implants with 'All on Four' prosthesis. Treatment will be reviewed from a combined surgical / restorative perspective. There will be specific attention paid to the smile line, transition line, emergence profile, abutment selection, and prosthetic / surgical communication will be emphasized.

**Lecture: 9 am – 12pm**

Learning objectives

- Identify the need and opportunity to treat edentulous patients with fixed-detachable prostheses.
- Provide a plan to execute treatment in a simple, efficient, predictable and profitable manner.
- Provide the dentist and staff the tools to improve case acceptance, including fees
- Understand surgical concepts from the restorative perspective
- Understand prosthetic concepts from the surgical perspective
- Complications and their management
- Case review

**Hands On: 1 pm – 3pm**

Learning objectives

- Identify the components needed to treat edentulous patients with fixed detachable prostheses
- Convert complete dentures in fully edentulous single and dual arch situations
- Provide a plan to manage the on-going care and maintenance of the prosthesis

**Friday April 20<sup>th</sup>, 2018**

9am to 3pm

Registration at 8:30am  
(Breakfast and lunch provided)

**5 CE LECTURE HOURS**

Cost \$300

**To register please contact  
Sam Johnson at 360.695.7411.**

This training will be held at:

**Qualident Dental Lab, LLC  
5305 E 18<sup>th</sup> Street, Suite 100  
Vancouver, WA 98661  
360.695.7411 360.695.6547 fax  
[www.qualidentlab.com](http://www.qualidentlab.com)**

**Cancellation & Refund Policy:**

Cancellations must be received in writing via email to [sam@qualidentlab.com](mailto:sam@qualidentlab.com). A full refund will be given if cancelled 72 hours prior to the course.

**About Dr. El-Ebrashi**

A former professor of fixed, removable, and implant prosthodontics at Oregon Health and Sciences University, Dr. El-Ebrashi obtained his degree in dental surgery from the University of Newcastle upon Tyne in England. He subsequently completed training in prosthodontics and earned a Master of Science from the University of Michigan. Dr. El-Ebrashi is a Diplomate of the American Board of Prosthodontics, a fellow of the American College of Prosthodontics, and a board member of the National Foundation of Ectodermal Dysplasia. He has a love for his profession and constantly works to improve his skill set. Add to that his personable demeanor, good sense of humor and ability to relate to people and it's easy to see why he's well-liked by patients and colleagues.
