

*Synergy in Digital Dentistry:*  
*Connecting the digital team!*

There is a lot of talk about digital dentistry these days. This class is aimed at helping you understand some of the new ways digital technology is impacting both clinic and lab workflows.

**COURSE OBJECTIVES**

- *How to achieve exceptional results with digital impressions*
- *Digital Dentures / How they are made*
- *Learn the Nobel digital workflow*
- *Digital treatment planning*
- *Hands on demonstration of the Medit i500 intra-oral scanner*

**SPEAKER BIO**

**JR Dudley, Clinical Success Manager, Qualident**  
JR has been in the dental lab industry since 2010. He has played an integral role in helping countless dentists integrate intra-oral scanning technology into their practices and achieve exceptional results through ongoing support and clinical hands on training.

**Jeff Scarvie, Sr. Digital Specialist, Nobel Biocare**  
Jeff Scarvie has worked with dental teams for over 25 years, creating synergies between specialists, general dentists and their dental laboratory partners. Currently, working for Nobel Biocare, he is responsible for implementation of their digital products and workflows, dealing with diagnostics and treatment planning, imaging, and prosthetics. He has lectured locally and regionally on All-on-4, digital implant planning, digital impressions, and laboratory prosthetic design. He enjoys continuously learning about new technology and bringing that information to interested dental care providers.
