

# Qualident Dental Lab and Dentsply Sirona Presents: **Nuts and Bolts of Implant Based Dentures**

## **Program Focus:**

### **Learn contemporary cutting edge techniques for restoring the edentulous patient.**

There is a revolution going on in denture making and Dr. Wagner is leading the way. Imagine making an extremely high-quality complete denture in only 3 short thirty minute appointments. The time saved will benefit both you and the patient and improve any clinician's bottom line. It can be done and Dr. Wagner will show you exactly how to do it - start to finish!

## **Course objectives:**

Following completion of the program, the participant should have the knowledge to:

1. Understand the workflow for a new three appointment denture technique.
2. Prescribe and use implants to support removable and fixed complete dentures.
3. Set up the workflows required to complete implant-based restorations.

Organize and implement a simplified but high-quality denture service in a contemporary general dental practice.

## **Guest Speaker:**

Dr. Stephen Wagner, a Diplomate of the American Board of Prosthodontics, a Fellow of the Academy of Maxillofacial Prosthodontics and an Associate Fellow of the Academy of Prosthodontics, is currently in his 36th year of private practice in Albuquerque, New Mexico. He received his dental degree from the University of Southern California School of Dentistry in 1975 and his prosthodontic training from MD Anderson Hospital in Houston, Texas in 1978.

Dr. Wagner serves on the Review Board of the International Journal of Oral and Maxillofacial Implants and is Editor of the American College of Prosthodontists' Board Study Guide.

Dental images taken by Dr. Wagner have been used by the New York Times, ABC News, The Discovery Channel, Newsweek, and The American Dental Association in the Journal of the American Dental Association, ADA educational pamphlets, and on the ADA web site.

Dr. Wagner was the recipient of the American College of Prosthodontists' prestigious Private Practice award in 2015.

His primary clinical investigative interests center around work simplification in removable and maxillofacial prosthodontics. The Wagner Impression Tray is a product of this research.
